Notes: Public access duties include training the public, producing community interest public affairs programs, high school sports programming, etc. Government access includes telecast of city and county meetings from within city council and county commission chambers (fixed cameras). We also take an EFP unit to remote sites for live telecasts of meetings at community centers. I-NET: the city operates a 32-site WAN on the residential cable network plant using a VMS environment. The WAN supports e-mail functions, registration programs for parks and recreation facilities, etc. Th sites are located in city buildings throughout Raleigh. Use of the actual I-NET plant is limited. The I-NET was never built out substantially. Though, the cable operator installed a "downtown" cable loop that connects the Civic Center, community television, City Hall, and other buildings to the same coax. This facilitates the return of clean television feeds of civic events from downtown to the community television center. Daily access management is performed by city staff.

City/County: Bismarck

State: ND

Subscribers: 23,509

Local Operator: Dakota Cable Communications

Parent Company: TCI and Dakota Cable Com and Mid-Continent

Notes: Up to 4 channels provided on demand if one channel filled. One channel currently used for combined PEG.

City/County: Plymouth

State: NH

Subscribers: 2,493

Local Operator: State Cable TV Corporation (Augusta, ME)

Parent Company:

Franchise Fee %: 3

Annual Capital Support: \$0.00

Facilities/Staff/Equipment: Initial grant of \$5000 for equipment and single follow-up grant of \$1000. No further support. Implementation of the franchise fee has never been requested by the town. A warrant article authorizing the selectmen to request implementation was voted down in two consecutive town meetings. The access cablecasting center is housed in a closet in the Public library. Needless to say, there is no production or post-production facility located there.

Notes: One combined PEG channel. 2-3 other channels are not now operative; the franchise allows the town to exercise options to bring them online after a specified time period. The cable company and the town have been ambivalent to the franchise requirement that the community channel be non-commercial. At the insistence of several members of the town cable committee, 5 days a week we run a local, commercial radio station behind the bulletin board. The other 2 days we run the NPR affiliate.

Notes: City spends less than half of franchise money on PEG and cable related services.

City/County: Carson City

State: NV

Subscribers: 12,739

Local Operator: TCI Cablevision of Nevada

Parent Company: TCI

Franchise Fee %: 0

Annual Capital Support: \$0.00

Facilities/Staff/Equipment: TCI provided the city with \$150k for equipment and facilities support at the beginning of the agreement. On the condition that the city reach the 40% funding level for PEG within the three year agreement, TCI would provide another \$150k at the end of the three years. That occurred July, 1996. No other provisions for capital support have been made. We have one studio, 2 edit bays, robotics in the primary government meeting room, and various field equipment from the initial TCI funds. We are currently putting together a new four-year capital plan with the remaining TCI funds. Our operational funds for 5 FTE are established within the city budget which we need to request each year (currently \$110,000 a year).

Notes: Funding is not currently tied to the franchise fee. The three year agreement made between the city and TCI made the provision that within the three year period the city would reach a funding level for PEG of 40%. The agreement did not require the city to maintain funding at that level, only to guarantee that level for one of the three years (according the city's interpretation of the agreement).
